

Brother HL 2280dw Cartridge Install

The monochrome laser printer from Brother, HL 2280DW, comes with pre-installed starter toner cartridges that can print approximately 700 pages. The high-capacity toner cartridge prints approximately 2,600 pages. The starter toner cartridge needs to be replaced after 700 pages.

When your printer LCD screen displays Toner low, it is essential to replace the toner cartridge. Your printer stops printing and does not print until you replace the toner cartridge.

Why do you need to replace or install a toner cartridge?

- When the Replace toner or Toner low message displays on your printer LCD screen, you need to replace the toner cartridge.

- If the supplied starter toner cartridge prints approximately 700 pages, then it is recommended to install a new toner cartridge.

How to install or replace toner cartridges into your Brother HL 2280DW printer.

- Ensure that your Brother HL 2280DW printer is turned on.
- Open the front cover of your printer.
- Wait for 10 minutes.
- Take out the drum unit and toner cartridge assembly of your prin.....
